

Data Analytics DDS Template for rmA 13 Release Notes

General Overview

RISKMASTER Data Analytics is an optional add-on module for data import and extraction. Optional Templates are available for supporting specific file specifications. This release is specific to the DDS template. For details on hardware and software requirements, please refer to the Data Analytics Technical Specifications.

Data Analytics clients requesting this version of the DA DDS Template must be using RISKMASTER Accelerator 13.1 or higher. The appropriate RISKMASTER install files must be requested and applied prior to importing the latest DA DDS Template.

Also note, the Data Analytics DDS Template was upgraded to Data Analytics 3.2 SP3 FP5. This version of the DA DDS Template should not be installed prior to upgrading to Data Analytics 3.2 SP3 FP5. Please refer to the Pre-Installation Checklist and the Data Analytics Installation Guide on the Data Analytics page on RISKMASTER.com.

Issues Fixed

Release Date	MITS Number	Issue	Fix
02/28/2014	35159	Create a new DA DDS exe.	The Shared Interfaces dll was modified to not write the DA Management Console Log file to the temp directory when the Log file is zero bytes long. This modification forced new DA EXEs to be created for all DA Templates.
03/31/2011	19689	Undelete a deleted code to avoid unique key violation when import code.	DELETED_FLAG has been set to 0 for all the existing codes. Now a deleted code will be undeleted when the same code is being imported.
03/31/2011	21539	Not able to run a job with local csv file.	<ol style="list-style-type: none"> 1. All the Read dataflows will be having global variable for filename and file directory for the input csv file. 2. Read optionset dataflow has been changed as there is a change in DDS XML. 3. DDS_OPTIONSET table of staging database has been appended with 8 new columns.

			4. Changes made in the UI page of RMX which will assign values in the global variables for the filename. HOT PATCH REQUIRED.
03/31/2011	21553	Reserve Mapping checkbox gets unchecked when user comes back again at optionset screen.	The grid which displays the Reserves mapping was not bound to the values correctly while editing a DA DIS job. HOT PATCH REQUIRED.
03/31/2011	21790	Wrong DF name and Error Logging in DDS payments Validation Work Flow.	Error logging format corrected.
03/31/2011	22562	Cleared Tables value is blank in the DA DDS app.config file.	Added the table values for the ClearedTables tag in the app.config file for DDS.
03/31/2011	22608	Truncated error message for no tax id in DDS.	Error logging format corrected.
03/31/2011	22701	Upgrade DA DDS SQL Template to Data Services 3.2 SP2 FP2.	DA DDS SQL Template upgraded to Data Services 3.2 SP2 FP2.
03/31/2011	22900	Modify the DDS Optionset SQL file to avoid a failed insertion when the DATA INTEGRATOR TEMPLATES table is empty.	Updated the DDS_Optionset.sql script to avoid insertion fail when DATA_INTEGRATOR_TEMPLATE S table is empty (i.e. when, SELECT MAX(ROW_ID) FROM DATA_INTEGRATOR_TEMPLATE S returns NULL).
03/31/2011	23047	DA DDS Import files are not uploading to business layer if the presentation and business layers are on two separate servers.	The RISKMASTER Task Manager loads the import file on the RISKMASTER server and sends the file in a file stream to the Data Analytics server for further processing. HOT PATCH REQUIRED.
03/31/2011	23283	Version numbering of DA ATLs-SQL DDS.	A new global variable \$gATLVersionNumber was added to the DA DDS SQL atl file.
03/31/2011	23357	DDS RMX UI - If error comes up while saving criteria and user try to save it again, it shows option set name already exist.	The generated Optionset Id is created and saved in the RISKMASTER X database when a DA DDS task is scheduled. If an error occurs while saving the task, the Optionset Id is now deleted from the database and the task can be saved again. HOTPATCH REQUIRED.
03/31/2011	23364	DA DDS UI - If user select multiple modules and in case the import filenames are same	The module specific name is added as a prefix to the import file name for all Data Analytics

		for them, later one will overwrite the files selected for other modules.	templates. HOTPATCH REQUIRED.
03/31/2011	23554	C1.C1Zip.2.dll version is not compatible with the latest DA_DDS.exe.	The C1.C1Zip.2.dll was updated with the correct RMX R6 dlls. The DA_DDS.exe was rebuilt with the updated dll.
03/31/2011	23821	The DA_DDS_exe.config file should be the same as the other exe.config files.	Removed the <startup> tag and the <supportedRuntime version="v2.0.50727" /> tag from the app.config file. These tags are not in the other DA template config files.
03/31/2011	24623	DDS-Payments import throwing XML Schema mismatch error.	The Entity Match by Name, Match by Name and Tax Id, or Match by Tax Id option was included in the wrong function. The selected option is now set in the correct location of the Criteria Setting XML String. HOTPATCH REQUIRED.
03/31/2011	24657	DA DDS UI – DDS Job shows error while editing the existing saved job.	A condition was added in the DDS optionset screen to check the count of rows. If the count is zero, then the default reserve settings are retrieved. HOTPATCH REQUIRED.
